PROFESSIONAL SUMMARY

Senior Manager and tech-enabled operations leader, pairing a decade-long software engineering foundation with hands-on leadership across administration, HR, procurement, and finance. Proven cross-functional depth from companies including DXC Technology, Wipro, and MothersonSumi — from building ERP modules and web applications to managing vendor relations and operations. Currently leading a mid-size team at Simactricals, driving digital transformation through AI-integrated tools built with Python and large language models.

SKILLS

Technical Skills: Python, C#, VB.Net, JavaScript, SQL Server	Tools & Platforms: Azure, Google Cloud Platform, Git, CI/CD, VS Code, Visual Studio, SSMS, Oracle DB, Crystal Reports, Help Studio
AI & Automation: Prompt Engineering, AI-Assisted Development (Claude, Gemini, Antigravity)	Domain Expertise: ERP, SCM, Insurance, Finished Goods Tracing
Soft Skills: Team Management	

PROFESSIONAL EXPERIENCE

Senior Manager – Administration May 2025 – Present
Simactricals Private Limited

- Lead a mid-size team spanning administration, HR, procurement, finance, and internal software & hardware initiatives.
- Built an Employee Portal for attendance, reimbursement, and leave management with two-step approval workflows — engineering it end-to-end in Python using an AI agent-driven development workflow with leading large language models.
- Developed an internal Policy Chatbot enabling employees to query company policies conversationally through LLM integration.
- Created a company-specific Project Tracking System aligned to internal workflows and reporting requirements.
- Designed a Charging Data Dashboard with graphical test-case analytics for real-time, self-service visibility.
- Own procurement and vendor management, accounts and finance, and brand-awareness initiatives.

Senior Analyst II – Software Engineering Feb 2023 – Apr 2025
DXC Technology — *Client: GCube Insurance, London*

- Developed features for a web-based insurance application as part of the core development team.
- Provided production support for the live insurance platform, resolving issues and maintaining uptime.
- Contributed to the Help Studio tool supporting internal documentation and support workflows.

Senior Executive Apr 2021 – Feb 2023
Wipro Limited — *Client: The Estée Lauder Companies*

- Developed and supported Ecometry order-management applications.
- Maintained and enhanced the Cubiscan dimensioning application.
- Supported Stock Sync inventory-synchronization processes.

Software Engineer Jul 2016 – Apr 2021
MothersonSumi Infotech & Design Ltd. — *Client: Motherson Group*

- Built and maintained the eMPro ERP using VB.Net and C#.
- Developed web applications that reduced single points of failure and user-entry errors.
- Created the Traceability module within the in-house ERP.
